

Threats Don't Stop at the Firewall. Neither Do We.

Managed Endpoint Detection & Response — monitored, investigated, and contained by our SOC, 24/7/365.

Antivirus catches what it already knows. Modern attackers count on that. Endpoint Detection and Response continuously record what's happening across every laptop, desktop, and server - surfing the suspicious behavior that prevention tools miss and shut it down before it becomes a breach.

Prevention alone never reaches 100%. EDR catches what gets through.

Attackers linger for weeks. Continuous visibility ends the dwell time.

Most teams don't have 24/7 eyes on endpoints. Ours do.

Core Capabilities

Continuous Endpoint Visibility

- Real-time monitoring across all endpoints and workloads
- Full activity recording — processes, connections, logins, file changes
- Agent health and coverage tracking

Investigation & Threat Hunting

- 24/7 alert triage by dedicated SOC analysts
- Incident investigation, correlation, and escalation
- Proactive hunting for threats that never triggered an alert

Behavioral Threat Detection

- Detections aligned to MITRE ATTACK
- Behavior-based analytics that catch unknown and fileless threats
- Threat intelligence enrichment for real-world context

Rapid Response & Containment

- Host isolation to cut off a compromised endpoint instantly
- Guided remediation to get systems back in service
- Actionable reporting — what happened, and what to do next

The Accelecom Advantage

Security shouldn't be bolted on — it should ride on the same network you already trust. Delivered over Accelecom's carrier-grade fiber, your endpoint protection gains the performance, reliability, and low latency of a single, fully supported infrastructure. One provider. One network. One number to call.

- Enterprise-grade EDR without building a SOC
- Your team extended, not replaced
- Flexible terms — no long-term contract required

30

DAY TRIAL

Start Your 30-Day Trial!

See what's happening on your endpoints right now. Full monitoring, full visibility, no obligation.
