

Dedicated Internet Access

Accelerate productivity with reliable and dedicated fiber connectivity from Accelecom.

Trust in Accelecom’s Dedicated Internet Access services to ensure uninterrupted and secure Internet connectivity for your business. With guaranteed bandwidth and industry-leading reliability, your data flows smoothly, enabling your business to operate at its best.

Whether your business is in a rural or a metropolitan location, you can count on uptime as well as consistent speeds because of Accelecom’s fiber-rich network.

RESILIENT

Our network was built with redundancy, diverse routes and capacity as paramount objectives. In the unlikely event of a fiber cut, we can quickly re-route traffic to another data center without our users being aware of an outage.

24/7 MONITORING

Few carriers still offer this service, but we prefer a proactive approach to network design and reliability. We are constantly working to improve the network and take action when notified of any potential capacity issue or network breach. We’ll likely have the problem fixed before our clients are even impacted.

DEDICATED

When you have dedicated internet access, you no longer have to worry about the internet slowing down at peak usage times. Your connection is a direct path from our data center to your location where the provisioned bandwidth is always available to you and never shared.

SCALABLE

Each connection is built for fast symmetrical internet service up to 10 Gbps. No hardware changes are needed from 100M–10G and 10G–100G is available upon request. Reach out to your fiber consultant to request an upgrade, but if you are nearing the capacity of your connection, you’ll probably be hearing from them soon.

FEATURES

- 100 GB geo-redundant network.
- Fast, Reliable, Resilient.
- 100% of Kentucky’s counties are connected.
- Selectable transport speeds from 100 Mbps to 100 Gbps.

SLA Metric	Guarantees
Service Availability (<250km), Regional (<1200km)	99.99%
Frame Loss Ratio	≤ 0.01%
Latency / Frame Delay	≤ 23 ms
Jitter / Frame Delay Variation	≤ 3 ms
MTTR (Depending on Severity)	4 hours
